Dublin – Ireland

SUMMARY

I always had a strong interest in computing and technologies. I started studying some visual programming languages, e.g. Visual Basic, Delphi and MS Access. As an enthusiast, I also developed some web pages using HTML, CSS, JavaScript and an e-commerce running on Magento platform.

I worked as computer technician, building and fixing enterprise or personal machines and, as a volunteer, I taught Microsoft Office to people of all ages. Also, I have +12 years of experience working in business and financial market. When I coordinated an ERP implementation.

I moved to Dublin 2 years ago to study English and to return to the development area. I have been studying as a self-learner and at the moment I am attending third level college in Computing. I have been Learning languages and technologies and, currently, my focus is on mobile development. I have been working on several projects exploring software design techniques as a freelancer.

I am looking for a mobile developer position that can offer teamwork, constant learning, training and coaching, and the opportunity to participate in projects with direct impact on users.
